Registered Address: Sovereign Place, 20 The Point, Market Harborough, Leicestershire, LE16 7QU. Radiant Asset Management is part of the Radiant Financial Group.

For your brighter future

## Portfolio Aim

The investment objective of the portfolio is to provide the opportunity for a moderate level of capital growth and income while lowering the risk of a significant loss of capital. The base currency of the portfolio is GBP sterling.

RAM Protect 4 aims to achieve an annual return in the range of 5.6% - 7.1% with a volatility in the range of 6.3% - 8.4%.

The portfolio will invest in global bonds, global equities, liquid alternative funds and cash. This diversification across different asset classes helps balance the risk of capital loss in a falling market.

RAM Protect 4 is Risk Target Managed to Dynamic Planner risk profiles and is aligned to a risk rating 4.

## Target Market

Retail clients looking to invest over a period of five to ten years and who are happy to accept a limited degree of investment risk (at least Dynamic Planner level 4), have the capacity to absorb some financial loss and an FCA regulated Financial Planner to help assess suitability. This portfolio is not suitable for clients who require guaranteed returns.

## Portfolio Indicative Performance\*

Since Inception	RAM Protect 4	Target Range
Annualised Return	5.0%	5.6% - 7.1%
Annualised Volatility	5.9%	6.3% - 8.4%

Since Inception	RAM Protect 4
Maximum Drawdown	-10.4%

### Discrete Years' Performance\* 12 months ending:

	Apr-25	Apr-24	Apr-23	Apr-22	Apr-21
RAM Protect 4	5.6%	6.0%	-1.3%	3.0%	12.8%
UK CPI + 1%	3.7%	3.4%	9.7%	10.1%	2.5%

### Annualised Performance\*

	1 year	3 years	5 years	Since Inception
RAM Protect 4	5.6%	3.4%	5.1%	5.0%
UK CPI + 1%	3.7%	6.3%	5.7%	4.4%

Since Inception Data from 30 November 2015 to 30 April 2025.  
Performance data is net of RAM discretionary portfolio fees and other costs, but excludes any Adviser and Platform charges. These charges will act to reduce performance.  
UK CPI: Consumer Price Index is an indication of inflation and has a 1-month lag.

## Cumulative Returns\*

### Key Risks:

- Past performance is not a guide to future performance.
- The value of an investment, and any income from it, can fall or rise. Investors may not get back the full amount they invest.

### Important Performance Information

\*Performance data from 30/11/2015 to 18/04/2022 is calculated using a simulated track record provided by SEI Global Investment Management Limited. Performance from 19/04/2022 to latest month end is an actual live track record, sourced from SEI. Unlike actual performance, simulated results do not represent an actual fund track record. The data shown relates to simulated past performance. Simulated past performance is not a reliable indicator of future results. This simulation does not represent SEI's ability within the underlying funds to make decisions on which positions to include. There is no guarantee this algorithm will be successful in the future or that the same algorithm would have been used if the fund was actually being managed at the time. More information about the simulation is available upon request. Performance shown may differ from the MPS performance across platforms due to slight variations of the way cash is held and the platform interest rates paid on cash.

## Key Facts

Portfolio Information	
Launch date	19 April 2022
Currency	GBP sterling
Dealing	Daily
Minimum initial investment	£5,000
Minimum additional investment	£250

Please note that due to rounding and cash, the asset allocation breakdowns may not sum up to 100.0%.  
For operational reasons, across most platforms 0.6% cash is held in each model to pay for platform, adviser and DFM fees.

Over 9,900 Holdings (Number of underlying holdings per sub-asset class below)															
574	302	1517	397	277	362	873	468	28	645	2378	1107	893	44	67	55

\* The absolute return asset class aims to exploit active management opportunities that are not always accessible in conventional asset classes, such as equity, fixed interest, or cash. This could involve, for example, investing in long (betting on price appreciation) and short (betting on price depreciation) positions, to help generate profits or protect capital in both rising and falling markets.
